Dolan McEnery High Yield Strategy Overview

Dolan McEnery High Yield is a fixed income investment product that utilizes U.S. corporate investment grade, U.S. corporate high yield and U.S. Treasury securities. Dolan McEnery High Yield is approximately 90% U.S. corporate high yield bonds and 10% U.S. corporate investment grade bonds. The Dolan McEnery High Yield Composite was established and created on September 30, 2015.

Performance

Investment Strategy and Process

Dolan McEnery searches for bonds that trade at wide spreads and attractive prices but are issued by companies with acceptable levels of credit risk. The firm's core competence is credit analysis and it does its credit research in-house, not relying at all on credit ratings or third party research. The firm takes a lender's approach to fixed income investing.

Dolan McEnery creates concentrated portfolios of its best ideas. The number of issuers in the product ranges from 25 to 45. This number of holdings provides diversification and yet allows clients to benefit from the firm's analysis.

Strategy Risk Information

	1 Year	3 Year	5 Year	7 Year	Inception
Sharpe Ratio	-0.52	-0.13	0.11	0.42	0.37
Excess Return vs Corporate HY Ba/B	0.80	-1.87	-1.18	-1.61	-1.37
Information Ratio vs Corporate HY Ba/B	0.36	-0.70	-0.55	-0.83	-0.69
Tracking Error vs Corporate HY Ba/B	2.20	2.65	2.15	1.94	1.99

The Strategy Risk Information data is reported as of 01/31/2023 by eVestment Alliance. eVestment Alliance (eA) is an innovative, web-based provider of comprehensive investment information and analytic technology. eVestment Alliance collects information directly from investment management firms and other sources believed to be reliable. Returns for periods exceeding 12 months are annualized. Past performance is no guarantee of future results. The data above is net of fees.

Strategy Management

- Bottom up approach focusing on credit analysis and adding value to client portfolios through the identification and selection of bonds Dolan McEnery believes are undervalued
- Does not invest in the securities of banks or broker dealers
- Duration neutral to the benchmark
- All maturities are ten years or less
- Position sizes are approximately 4%

Risk Profile

Dolan McEnery High Yield composite risk profile versus its benchmark since inception.

Market Review

During the first month of 2023, the market reversed course after a difficult year and positive returns were seen in many equity and fixed income markets. High inflation was one of the key stories in 2022. Economic data during the month of January indicate that, while still elevated, inflation may be decelerating.

After raising the Federal Funds rate significantly in 2022, the market expects the Federal Reserve to be nearing the end of the rate hiking cycle. As a result of the actions taken by the Federal Reserve over the last year, yields are among the highest they have been in over a decade.

During the month, treasury rates decreased, and the curve remained inverted as the 10 year U.S. Treasury yield decreased from 3.88% to 3.51%, the 5 year yield decreased from 4.01% to 3.62% and the 2 year yield decreased from 4.43% to 4.21%.

Per Bloomberg data, spreads of corporate investment grade bonds tightened 13 basis points during the month to an average option adjusted spread ("OAS") of +117 basis points. The OAS of the Bloomberg Corporate High Yield Index tightened 49 basis points to +420 basis points at month end.

Portfolio Commentary

During the month, the High Yield Composite had a gross return of +2.61% and +2.56% net versus the +3.53% return of the Bloomberg Corporate High Yield Ba/B Index. Sector attribution versus the benchmark is provided in the following table:

	Dolan McEnery High Yield (Gross) (1)	Bloomberg U.S. Corporate High Yield Ba/B (2)	Difference (1)-(2)
Treasuries/ Government Related	+0.00%	+0.00%	+0.00%
Corporate Bonds IG	+3.50%	+0.00%	+3.50%
Corporate Bonds HY	+2.41%	+3.53%	-1.12%
Cash	+0.52%	+0.00%	+0.52%
Total	+2.61%	+3.53%	-0.92%

Dolan McEnery underperformed the Bloomberg High Yield Ba/B Index by 92 basis points gross during the month. The underperformance was due to security selection.

Outlook and Strategy

Dolan McEnery believes that client portfolios are positioned to provide reasonable absolute and relative returns going forward. Dolan McEnery's core competence is credit analysis, and we focus on a company's ability to generate generous amounts of free cash flow over time in relation to its indebtedness. Investment safety and risk mitigation are of primary importance as we continue to search for undervalued fixed income securities. As of January 31st, the Dolan McEnery High Yield Composite had a yield to worst of 6.90% and yield to maturity of 6.90% (including ~2% cash and Treasuries). Dolan McEnery will continue to follow our disciplined approach as value investors by deploying cash and investing in bonds with wide spreads and solid credit fundamentals.

- Composite dispersion is not presented for years where there are 5 or fewer portfolios in the composite for the full year because it is not statistically meaningful.
- The 3-year ex-post standard deviation is not required to be presented for periods prior to 2011 or when 36 monthly composite returns are not available.

Compliance Statement

Dolan McEnery Capital Management, LLC claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS standards. Dolan McEnery Capital Management, LLC has been independently verified for the periods September 30, 1997 through December 31, 2021. A firm that claims compliance with the GIPS standards must establish policies and procedures for complying with all the applicable requirements of the GIPS standards. Verification provides assurance on whether the firm's policies and procedures related to composite and pooled fund maintenance, as well as the calculation, presentation, and distribution of performance, have been designed in compliance with the GIPS standards and have been implemented on a firm-wide basis. The Dolan McEnery High Yield Composite has had a performance examination for the periods September 30, 2015 through December 31, 2021. The verification and performance examination reports are available upon request.

*Dolan McEnery High Yield inception date is September 30, 2015; 2015 is a three month period.

Definition of the Firm

Dolan McEnery Capital Management, LLC is an independent investment management firm established in 1997 and is an SEC registered investment adviser. Registration of an adviser does not imply a certain level of skill or training. Dolan McEnery Capital Management, LLC manages fixed income accounts utilizing Dolan McEnery's specific strategies for institutional and individual clients.

Definition of the Composite

Dolan McEnery High Yield is a fixed income investment product benchmarked against the Bloomberg U.S. Corporate High Yield Ba/B Index. In this strategy, the firm utilizes entirely U.S. corporate high yield bonds; however, the strategy will invest in U.S. corporate investment grade bonds when appropriate. Dolan McEnery High Yield is approximately 90% U.S. corporate high yield bonds and 10% U.S. corporate investment grade bonds. The Dolan McEnery High Yield Composite was established and created on September 30, 2015.

Non-fee paying accounts represented less than 2% of the composite assets for all periods shown after July 31, 2016. Performance results prior to July 31, 2016 are derived from the returns of fully discretionary separate accounts made up of the firm's own capital. Due to the internal nature of the funds, no management fees have been charged to the accounts throughout their lifespans. There were less than 2% of non-fee paying accounts in the composite as of December 31, 2021.

Benchmark

Bloomberg U.S. Corporate High Yield Ba/B Index The Index is the Ba/B component of the Bloomberg US Corporate High Yield Index. The Index measures the USD-denominated, high yield, fixed-rate corporate bond market. Bonds from issuers with an emerging markets country of risk, based on the indices' EM country definition, are excluded. The corporate sectors include industrial, financial institutions, and utility. Bonds must have at least one year until final maturity.

Intra-month cash flows from interest and principal payments contribute to monthly Index returns but are not reinvested at a short-term reinvestment rate between rebalance dates. At each rebalancing, cash is effectively reinvested into the returns universe for the following month so that Index results over two or more months reflect monthly compounding. One cannot invest directly in an Index.

List of Composites

A complete listing and description of all composites, limited distribution pooled funds, and broad distribution pooled funds is available upon request.

Dispersion

The dispersion of annual returns is measured by the asset weighted standard deviation across gross portfolio returns represented within the composite for the full year.

Performance

Gross returns are presented gross of management fees, custodial fees, and withholding taxes, but net of direct trading expenses. Net-of-fee returns are net of actual investment management fees and direct trading expenses. Prior to 12/31/2018, net-of-fee returns were based on a model 0.60% (60bps) investment management fee applied monthly and direct trading expense. All returns are based in U.S. dollars and computed using a time-weighted total return. Composite returns are asset weighted individual portfolios computed monthly. Returns for periods exceeding 12 months are annualized. The Dolan McEniry High Yield Composite includes both price performance and coupon/dividend income as does the Bloomberg U.S Corporate High Yield Ba/B Index. Results reflect the reinvestment of dividends, interest and other earnings. The Dolan McEniry performance reflected above is not necessarily indicative of future results and, as a composite of different accounts, does not necessarily reflect the exact performance of any specific account. Policies for valuing investments, calculating performance, and preparing GIPS Reports are available upon request.

Fee Schedule

Dolan McEniry Capital Management, LLC's standard fee is 0.60% (60bps) of assets under management for accounts over \$1,000,000 USD.
