Dolan McEniry Core Strategy Overview

Dolan McEniry Core is a fixed income investment product that utilizes entirely U.S. corporate investment grade and U.S. Treasury securities. Dolan McEniry Core is approximately 100% U.S. investment grade securities. The Dolan McEniry Core Composite was created on December 31, 2015 and includes investment grade only accounts going back to September 30, 2003.

Performance

Investment Strategy and Process

Dolan McEniry searches for bonds that trade at wide spreads and attractive prices but are issued by companies with acceptable levels of credit risk. The firm's core competence is credit analysis and it does its credit research in-house, not relying at all on credit ratings or third party research. The firm takes a lender's approach to fixed income investing.

Dolan McEniry creates concentrated portfolios of its best ideas. The number of issuers in the product ranges from 40 to 45. This number of holdings provides diversification and yet allows clients to benefit from the firm's analysis.

Strategy Risk Information

	1 Year	3 Year	5 Year	7 Year	10 Year	Inception
Sharpe Ratio	-1.50	0.17	-0.50	-0.10	0.08	0.67

Upside Downside Market Capture

Risk Profile

Dolan McEniry Core composite risk profile versus its benchmarks since inception.

As of May 31,2025, the Dolan McEniry Investment Grade Composite was renamed the Dolan McEniry Core Composite. Dolan McEniry Core inception date is 09/30/2003. eVestment Alliance (eA) is an innovative, web-based provider of comprehensive investment information and analytic technology. eVestment Alliance collects information directly from investment management firms and other sources believed to be reliable. The Risk Profile and Upside Downside Market Capture data is reported since inception by eVestment Alliance as of 09/30/2026. The statistics do not reflect a representation of any one client's experience. Information shown is supplemental to GIPS Report, which are included at the end of this presentation on pages 4-5. A complete list and description of composites is available upon request. The calculation methodology for upside/downside market capture is available upon request. Returns for periods exceeding 12 months are annualized. Past performance is no guarantee of future results. Please see composite disclosures. The data is net of fees.

Market Review

The dominant theme of the third quarter of 2026 was a rapid increase in interest rates. Many fixed income products saw negative returns as the yield on the 10-year Treasury note increased 82 basis points in the quarter. Credit spreads were somewhat wider during the quarter, but many equity indices posted positive returns despite higher rates. The increase in rates was largely driven by inflation fears as continued hostilities in Iran drove a 30% surge in crude oil prices during the quarter and inflation measures remained well above the Fed's 2% target.

The Federal Open Market Committee (FOMC) unanimously voted to raise the federal funds rate to a target range of 3.75% to 4.00% at their September meeting after voting 9-3 to keep it unchanged in July. Market expectations for the path of interest rates moving forward continued to move higher during the quarter. Markets currently expect one more 25 basis point hike before the end of the year, and two to three more in 2027. Credit quality remains strong and Dolan McEniry will continue to monitor markets for any opportunities that may arise.

During the quarter, Treasury yields increased. The ten-year U.S. Treasury yield rose from 4.47% to 5.29%, the five-year yield increased from 4.23% to 5.09% and the two-year yield increased from 4.18% to 4.89%.

Per Bloomberg data, spreads of corporate investment grade bonds widened 6 basis points during the quarter to an average option adjusted spread ("OAS") of +80 basis points. The OAS of the Bloomberg Corporate High Yield Index widened 42 basis points to +311 basis points at quarter end.

Portfolio Commentary

During the quarter, the Dolan McEniry Core Composite had a gross return of -2.29% and -2.35% net versus the Bloomberg U.S. Aggregate Bond benchmark return of -3.51% and Bloomberg U.S. Intermediate Credit benchmark return of -2.26%. Sector attribution versus the benchmark is provided in the following table:

	Dolan McEniry Core (Gross)	Dolan McEniry Core (Net)	Bloomberg U.S. Aggregate	Bloomberg U.S. Intermediate Credit
Treasuries	-0.04%	-0.04%	-3.04%	+0.00%
Government Related	+0.00%	+0.00%	-2.99%	-2.00%
Corporate Bonds IG	-2.40%	-2.40%	-3.95%	-2.31%
Corporate Bonds HY	-0.79%	-0.79%	+0.00%	+0.00%
Mortgage Backed Securities	+0.00%	+0.00%	-4.11%	+0.00%
Cash (including fees)	+0.83%	+0.77%	+0.00%	+0.00%
Total	**-2.29%**	**-2.35%**	**-3.51%**	**-2.26%**

On a relative basis, the Dolan McEniry Core Composite outperformed the Bloomberg U.S. Aggregate Bond Index by 122 basis points for the quarter. The composite's outperformance was driven by relative outperformance in the corporate investment grade sector and relative outperformance in the Treasury sector. The yield curve positioning and duration had a positive effect on relative performance versus the benchmark.

On a relative basis, the Dolan McEniry Core Composite underperformed the Bloomberg U.S. Credit Intermediate Index by 3 basis points for the quarter. The composite's underperformance was driven by relative underperformance in the corporate investment grade sector. The yield curve positioning and duration had a minimal effect on relative performance versus the benchmark.

Outlook and Strategy

Dolan McEniry believes that client portfolios are positioned to provide reasonable absolute and relative returns going forward. Dolan McEniry's core competence is credit analysis, and we focus on a company's ability to generate generous amounts of free cash flow over time in relation to its indebtedness. Investment safety and risk mitigation are of primary importance as we continue to search for undervalued fixed income securities. As of September 30th, the Dolan McEniry Core Composite had a +38 basis point yield premium and shorter duration to the Bloomberg U.S. Aggregate Bond and a +21 basis point yield premium and similar duration versus the Bloomberg U.S. Intermediate Credit. We believe these stats will allow the portfolio to perform well versus the benchmarks over time.

Security Selection

Top Performers	Bottom Performers
United Rentals Inc.	Flowers Foods Inc.
Expedia Group Inc.	CF Industries Inc.

1. Composite dispersion is not presented for years where there are 5 or fewer portfolios in the composite for the full year because it is not statistically meaningful.
2. The 3-year ex-post standard deviation is not required to be presented for periods prior to 2011 or when 36 monthly composite returns are not available.
3. Returns are calculated and presented as net of maximum annual advisory fee, 2.50%, plus the maximum product manager fee, 0.40%.

Compliance Statement

Dolan McEniry Capital Management, LLC claims compliance with the Global investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS standards. Dolan McEniry Capital Management, LLC has been independently verified for the periods September 30, 1997 through December 31, 2025. A firm that claims compliance with the GIPS standards must establish policies and procedures for complying with all the applicable requirements of the GIPS standards. Verification provides assurance on whether the firm's policies and procedures related to composite and pooled fund maintenance, as well as the calculation, presentation, and distribution of performance, have been designed in compliance with the GIPS standards and have been implemented on a firm-wide basis. The Dolan McEniry Core Composite has had a performance examination for the periods September 30, 2003 through December 31, 2025. The verification and performance examination reports are available upon request.

Dolan McEniry Core inception date is September 30, 2003; 2003 is a three month period.

Definition of the Firm

Dolan McEniry Capital Management, LLC is an independent investment management firm established in 1997 and is an SEC registered investment adviser. Registration of an adviser does not imply a certain level of skill or training. Dolan McEniry Capital Management, LLC manages fixed income accounts utilizing Dolan McEniry's specific strategies for institutional and individual clients.

Definition of the Composite

As of May 31, 2025, the Dolan McEniry Investment Grade Composite was renamed the Dolan McEniry Core Composite. Dolan McEniry Core is a fixed income investment product benchmarked against the Bloomberg U.S. Intermediate Credit Index or Bloomberg U.S. Aggregate Index. In this strategy, the firm utilizes entirely U.S. corporate investment grade bonds and U.S. Treasury securities. Dolan McEniry Core is approximately 100% U.S. investment grade securities. The Dolan McEniry Core Composite was created on December 31, 2015 and includes investment grade only accounts going back to September 30, 2003.

Non-fee paying accounts represented less than 2% of the composite assets for all periods shown before December 31, 2019. As of December 31, 2019, there were 2.46% non-fee paying accounts in the composite. Non-fee paying accounts represented less than 2% of the composite assets as of December 31, 2020, 2.05% of the composite assets as of December 31, 2021, no non-fee paying assets as of December 31, 2022, and less than 2% of the composite assets as of December 31, 2023. Non-fee paying accounts represented less than 2% of the composite assets as of December 31, 2024. Non-fee paying accounts represented less than 2% of the composite assets as of December 31, 2025.

Benchmark

Bloomberg U.S. Aggregate Index
The Index is a broad-based flagship benchmark that measures the investment grade, U.S. dollar-denominated, fixed-rate taxable bond market. The Index includes Treasuries, government-related and corporate securities, MBS (agency fixed-rate and hybrid ARM pass-throughs), ABS, and CMBS (agency and non-agency).

Bloomberg U.S. Intermediate Credit Index
The Index is the intermediate component of the Bloomberg U.S. Credit Index. The Bloomberg U.S. Credit Index measures the investment grade, US dollar-denominated, fixed-rate, taxable, corporate and government–related bond markets. It is composed of the US Corporate Index and a non-corporate component that includes foreign agencies, sovereigns, supranationals, and local authorities.

Intra-month cash flows from interest and principal payments contribute to monthly Index returns but are not reinvested at a short-term reinvestment rate between rebalance dates. At each rebalancing, cash is effectively reinvested into the returns universe for the following month so that Index results over two or more months reflect monthly compounding. One cannot invest directly in an Index.

List of Composites

A complete listing and description of all composites, limited distribution pooled funds, and broad distribution pooled funds is available upon request.

Dispersion

The dispersion of annual returns is measured by the asset weighted standard deviation across gross portfolio returns represented within the composite for the full year.

Performance

Gross and net performance is net of all trading expenses. Composite Net Returns are presented net of actual investment management fees. Composite Net of Maximum Annual Advisory and Product Fee returns are calculated by subtracting 1/12th of 2.90% from the monthly gross return. 2.90% represents the maximum wrap fee that a sponsor may charge clients seeking investment management services in the designated strategy. Wrap fees may include, among others, custodial fees, portfolio management fees, administrative fees and transactional fees. The maximum product fee Dolan McEniry charges for management of a client portfolio is 40 basis points. The maximum wrap fee charged by a wrap platform is 250 basis points annually. All returns are based in U.S. dollars and computed using a time-weighted total return. Composite returns are asset weighted individual portfolios computed monthly. Returns for periods exceeding 12 months are annualized. The Dolan McEniry Core Composite includes both price performance and coupon/dividend income as do the Bloomberg U.S. Intermediate Credit Index and Bloomberg U.S. Aggregate Index. Results reflect the reinvestment of dividends, interest and other earnings. The Dolan McEniry performance reflected above is not necessarily indicative of future results and, as a composite of different accounts, does not necessarily reflect the exact performance of any specific account. Policies for valuing investments, calculating performance, and preparing GIPS Reports are available upon request.

Fee Schedule

Dolan McEniry Capital Management, LLC's standard fee is 0.40% (40bps) of assets under management.
