Go Anywhere SMAs

SMA Portfolio Highlights

- ▶ “Go-anywhere” ETF based equity and asset allocation strategies that invest across asset classes, geography, and market segments such as size, style, sector, and quality.
- ▶ SMAs seek to maximize total returns across five distinct ETF strategies.
- ▶ Managing within risk parameters will be a focus of our approach.
- ▶ Over time, and under normal market conditions, the portfolios should consistently be invested in a mix of size/style/asset classes to pursue our objective.
- ▶ Strategic policy guidelines are in place to provide an additional layer of risk-management.

Flexible Asset Allocations

- ▶ **Equity**
 - Developed Markets
 - Emerging Markets
 - Domestic
 - Foreign
 - Sectors
 - Preferred
 - Currency Hedging
- ▶ **Commodities**
- ▶ **Cash**
- ▶ **Fixed Income**
 - Domestic
 - Foreign
 - Investment grade
 - High-yield
 - Corporate
 - Government
 - Municipal
 - Agency
 - Inflation-linked
 - Mortgage-backed
 - Interest Rate Hedging

Separately Managed Account ETF Portfolios

Investment Process

Top-Down Macro Assessment

- ▶ **Corporate Profits:**
 - Proprietary indicators & forecasts
 - Pricing power & inflation
 - Earnings expectations
- ▶ **Liquidity:**
 - Central bank analysis
 - Yield curves
 - Lending standards
- ▶ **Sentiment:**
 - Structural long-term sentiment
 - Valuation of market segments
 - Consensus positioning

Risk Assessment

- ▶ **Diversification is based on correlation of assets within the portfolio, rather than the number of assets.**
 - Review risk of opportunistic asset allocation targets within a rigorous variance-covariance framework.
- ▶ **Capital Market Assumptions**
 - Utilize capital market assumptions based primarily on historical asset class data to set baseline for risk taking.

Strategic Policy Guidelines

- ▶ **Guidelines provide an additional layer of risk management.**
 - Normal tactical deviations will be within 10% of RBA's long-term "neutral" policy based on each risk category.
 - "High Conviction" tactical deviations will be within 25% of RBA's long-term "neutral" policy based on each risk category.*

*Only applies to select strategies.

Asset Allocation Decisions

- | | | |
|------------------------|--------------------------------|------------------------------|
| Growth vs. Value | Stocks vs. Bonds | High Quality vs. Low Quality |
| Large vs. Small-cap | Cyclical vs. Defensive Sectors | Long vs. Short Duration |
| Emerging vs. Developed | Sovereign vs. Corporate Bonds | Commodities |

Separately Managed Account ETF Portfolios

ETF Selection & Implementation Process

ETF Portfolio Selection & Construction

Quantitative screening with qualitative review (>1,000 ETF universe)

- ▶ Prefer AUM > \$100 million
- ▶ Prefer trading history > 1 year
- ▶ Liquidity: ETF share volume + underlying basket volume
- ▶ Bid/Ask spread
- ▶ Legal structure
- ▶ Construction methodology
- ▶ Discount / premium to NAV
- ▶ Sponsor reputation and transparency
- ▶ Exposure: fit to targeted market segments: region, style, sector, credit quality, duration, etc.
- ▶ Minimize fees relative to market-segment peers
- ▶ Minimize tracking error relative to market-segment peers

Resulting In

ETF Portfolios

- ▶ Typically 5-30 ETFs
- ▶ Maximize contribution from top-down macro-economic views
- ▶ Minimize portfolio risk through asset class portfolio risk measurement
- ▶ Minimize stock-specific risk through usage of ETFs

RBA Global Risk-Balanced Moderate ETF Strategy

Performance Disclosure

The performance was calculated by Richard Bernstein Advisors LLC (the “Adviser”) for the Global Risk Balanced Moderate ETF Strategy (“Strategy”) as described below. The Strategy’s asset allocation recommendations are subject to guideline allocation limitations at the major asset class level (i.e., equity, fixed income and cash) that may change over time.

The Strategy has an inception date of September 30, 2011. The Strategy seeks risk-adjusted long-term growth by employing a top-down style to construct a global tactical asset allocation portfolio with flexible guardrails. Accounts in this Strategy obtain desired exposure via ETF vehicles.

The Strategy returns represents the all-asset composite return from October 1, 2011 until December 31, 2015 and thereafter represents the composite returns of the Global Risk Balanced Moderate ETF strategy maintained by RBA. The Global Risk Balanced Moderate ETF strategy is presented after December 31, 2015. The benchmark is composed as follows: 50% MSCI ACWI USD Net, 45% Bloomberg US Aggregate Index Unhedged USD, and 5% Bloomberg US Treasury Bills: 1-3 Months Index Unhedged. The benchmark is rebalanced daily. The firm’s complete list of composite returns are available upon request.

Past performance is no guarantee of future results. Performance is shown in USD and includes reinvestment of dividends and other earnings. Results are shown on a “gross” and “net” basis. Gross-of-fee returns are reduced by actual trading costs incurred and platform fees but are before deduction of any advisory or other fees. Net performance is shown net of a model annual advisory fee of 0.40% deducted on a monthly basis, the highest fee charged by the Adviser. Taxes have not been deducted.

Index and portfolio data herein have been supplied by outside sources, including, Richard Bernstein Advisors LLC, and are believed to be reliable as of the date indicated. The source for ETF returns is Bloomberg. The source for risk measures is Morningstar.

Performance Disclosure

The performance was calculated by Richard Bernstein Advisors LLC (the “Adviser”) for the Global Conservative ETF Strategy (“Strategy”) as described below. The Strategy’s asset allocation recommendations are subject to guideline allocation limitations at the major asset class level (i.e., equity fixed income and cash) that may change over time.

The Strategy has an inception date of June 30, 2016. The Strategy seeks capital preservation with some moderate appreciation potential over a medium to long-term investment horizon by employing a top-down style to construct a global tactical asset allocation portfolio. Accounts in this Strategy obtain desired exposure via ETF vehicles.

The Strategy benchmark is composed as follows: 20% MSCI ACWI USD Net, 75% Bloomberg US Aggregate Index Unhedged USD, and 5% Bloomberg US Treasury Bills: 1-3 Months Index Unhedged. The benchmark is rebalanced daily.

Past performance is no guarantee of future results. Performance is shown in USD and includes reinvestment of dividends and other earnings. Results are shown on a “gross” and “net” basis. Gross-of-fee returns are reduced by actual trading costs incurred and platform fees but are before deduction of any advisory or other fees. Net performance is shown net of a model annual advisory fee of 0.40% deducted on a monthly basis, the highest fee charged by the Adviser. Taxes have not been deducted.

Index and portfolio data herein have been supplied by outside sources, including, Richard Bernstein Advisors LLC, and are believed to be reliable as of the date indicated. The source for ETF returns is Bloomberg. The source for risk measures is Morningstar.

Performance Disclosure

The performance was calculated by Richard Bernstein Advisors LLC (the “Adviser”) for the Global Moderate ETF Strategy (“Strategy”) as described below. The Strategy’s asset allocation recommendations are subject to guideline allocation limitations at the major asset class level (i.e., equity, fixed income and cash) that may change over time.

The Strategy has an inception date of September 30, 2011. The Strategy seeks risk-adjusted long-term growth for a moderate risk tolerance by employing a top-down style to construct a global tactical asset allocation portfolio. Accounts in this Strategy obtain desired exposure via ETF vehicles.

The Strategy returns represents the all-asset composite return from October 1, 2011 until March 31, 2018 and thereafter represents the composite returns of the Global Moderate ETF strategy maintained by RBA. The Global Moderate ETF strategy is presented after March 31, 2018.

The benchmark is composed as follows: 50% MSCI ACWI USD Net, 45% Bloomberg US Aggregate Index Unhedged USD, and 5% Bloomberg US Treasury Bills: 1-3 Months Index Unhedged. The benchmark is rebalanced daily. The firm’s complete list of composite returns is available upon request.

Past performance is no guarantee of future results. Performance is shown in USD and includes reinvestment of dividends and other earnings. Results are shown on a “gross” and “net” basis. Gross-of-fee returns are reduced by actual trading costs incurred and platform fees but are before deduction of any advisory or other fees. Net performance is shown net of a model annual advisory fee of 0.40% deducted on a monthly basis, the highest fee charged by the Adviser. Taxes have not been deducted.

Index and portfolio data herein have been supplied by outside sources, including, Richard Bernstein Advisors LLC, and are believed to be reliable as of the date indicated. The source for ETF returns is Bloomberg. The source for risk measures is Morningstar.

Performance Disclosure

The performance was calculated by Richard Bernstein Advisors LLC (the “Adviser”) for the Global Equity ETF Strategy (“Strategy”) as described below. The Strategy’s asset allocation recommendations are subject to guideline allocation limitations at the major asset class level (i.e., equity and cash) that may change over time.

The Strategy has an inception date of October 31, 2010. The Strategy seeks risk-adjusted long-term growth by employing a top-down style to construct a global tactical equity portfolio. Accounts in this Strategy obtain desired exposure via ETF vehicles.

The Strategy represents the global equity composite return from October 31, 2010 until June 30, 2016 and thereafter represents the composite returns of the Global Equity ETF strategy maintained by RBA. The Global Equity ETF strategy is presented after June 30, 2016.

The benchmark is MSCI ACWI USD Net. The firm’s complete list of composite returns are available upon request.

Past performance is no guarantee of future results. Performance is shown in USD and includes reinvestment of dividends and other earnings. Results are shown on a “gross” and “net” basis. Gross-of-fee returns are reduced by actual trading costs incurred and platform fees but are before deduction of any advisory or other fees. Net performance is shown net of a model annual advisory fee of 0.40% deducted on a monthly basis, the highest fee charged by the Adviser. Taxes have not been deducted.

Index and portfolio data herein have been supplied by outside sources, including, Richard Bernstein Advisors LLC, and are believed to be reliable as of the date indicated. The source for ETF returns is Bloomberg. The source for risk measures is Morningstar.

Index Descriptions

The following descriptions, while believed to be accurate, are in some cases abbreviated versions of more detailed or comprehensive definitions available from the sponsors or originators of the respective indices. Anyone interested in such further details is free to consult each such sponsor's or originator's website.

Past performance of an index is no guarantee of future results. Unless otherwise stated, index returns do not reflect the effect of any applicable sales charges, commissions, expenses, taxes or leverage, as applicable. It is not possible to invest directly in an index. Historical performance of the index illustrates market trends and does not represent the past or future performance of the strategies.

Each index reflects an unmanaged universe of securities without any deduction for advisory fees or other expenses that would reduce actual returns, as well as the reinvestment of all income and dividends. An actual investment in the securities included in the index would require an investor to incur transaction costs, which would lower the performance results. **Indices are not actively managed and investors cannot invest directly in an index.**

MSCI data may not be reproduced or used for any other purpose. MSCI provides no warranties, has not prepared or approved this report, and has no liability hereunder.

US Fixed Income: Bloomberg U.S. Aggregate Index: An unmanaged index that tracks domestic investment-grade bonds, including corporate, government, and mortgage-backed securities.

S&P 500® : Standard & Poor's (S&P) 500® Index: The S&P 500® Index is an unmanaged, capitalization-weighted index designed to measure the performance of the broad U.S. economy through changes in the aggregate market value of 500 stocks representing all major industries.

World: MSCI ACWI Index. The MSCI ACWI Index is a free-float-adjusted, market-capitalization-weighted index designed to measure the equity-market performance of global developed and emerging markets.

MSCI ACWI Index is net of foreign withholdings taxes.

Sector/Industries: Sector/industry references in this report are in accordance with the Global Industry Classification Standard (GICS®) developed by MSCI Barra and Standard & Poor's. The GICS structure consists of 10 sectors, 24 industry groups, 68 industries and 154 sub-industries.

Bloomberg U.S. Treasury Bills: 1-3 Months. The U.S. Treasury Bills: 1-3 Months is the 1-3 month component of the U.S. Treasury Bill Index. The U.S. Treasury Bill Index includes U.S. Treasury bills with a maturity from one up to (but not including) 12 months. It excludes zero coupon strips.

Investments in foreign instruments or currencies can involve greater risk and volatility than U.S. investments because of adverse market, economic, political, regulatory, geopolitical or other conditions. In emerging countries, these risks may be more significant. The value of commodities investments will generally be affected by overall market movements and factors specific to a particular industry or commodity, including weather, embargoes, tariffs, or health, political, international and regulatory developments. An imbalance in supply and demand in the income market may result in valuation uncertainties and greater volatility, less liquidity, widening credit spreads and a lack of price transparency in the market. As interest rates rise, the value of certain income investments is likely to decline. Investments in income securities may be affected by changes in the creditworthiness of the issuer and are subject to the risk of non-payment of principal and interest. The value of income securities also may decline because of real or perceived concerns about the issuer's ability to make principal and interest payments. Smaller companies are generally subject to greater price fluctuations, limited liquidity, higher transaction costs and higher investment risk than larger, established companies. Derivatives instruments can be used to take both long and short positions, be highly volatile, result in economic leverage (which can magnify losses), and involve risks in addition to the risks of the underlying instrument on which the derivative is based, such as counterparty, correlation and liquidity risk. If a counterparty is unable to honor its commitments, the value may decline and/or the portfolio could experience delays in the return of collateral or other assets held by the counterparty.

The views expressed in this presentation are those of (portfolio manager/team) and are current only through the date stated and are not intended as investment advice or a recommendation to purchase or sell specific securities. These opinions may change at any time without notice, and there is no assurance that any securities discussed herein will remain in an account at the time you receive this report. While every effort has been made to verify the information contained herein, we make no representations as to its accuracy. It should not be assumed that any of the securities or transactions listed were or will be profitable. Actual portfolio holdings will vary for each client, and there is no guarantee that a particular client's account will hold any or all of the securities mentioned. It is not possible to invest directly in an Index.
