Dolan McEniry Credit Strategy Overview

Dolan McEniry Credit is a fixed income investment product that utilizes U.S. corporate investment grade, U.S. corporate high yield and U.S. Treasury securities. Dolan McEniry Credit is approximately 50% U.S. corporate investment grade bonds and 50% U.S. corporate high yield bonds. The Dolan McEniry Credit Composite was established and created on December 31, 2008.

Performance

● Dolan McEniry Credit (gross) ● Dolan McEniry Credit (net) ● Bloomberg U.S. Intermediate Credit

Investment Strategy and Process

Dolan McEniry searches for bonds that trade at wide spreads and attractive prices but are issued by companies with acceptable levels of credit risk. The firm's core competence is credit analysis and it does its credit research in-house, not relying at all on credit ratings or third party research. The firm takes a lender's approach to fixed income investing.

Dolan McEniry creates concentrated portfolios of its best ideas. The number of issuers in the product ranges from 45 to 50. This number of holdings provides diversification and yet allows clients to benefit from the firm's analysis.

Strategy Risk Information

	1 Year	3 Year	5 Year	7 Year	10 Year	Inception
Sharpe Ratio	1.09	0.59	-0.04	0.27	0.40	1.09
Excess Return vs Int-Credit	-0.30	0.41	1.29	0.79	1.11	1.87
Information Ratio vs Int-Credit	-0.32	0.33	0.62	0.34	0.55	1.00

Risk Profile

Dolan McEniry Credit composite risk profile versus its benchmark since inception.

Dolan McEniry Credit inception date is 12/31/2008. eVestment Alliance (eA) is an innovative, web-based provider of comprehensive investment information and analytic technology. eVestment Alliance collects information directly from investment management firms and other sources believed to be reliable. The Risk Profile and Upside Downside Market Capture data is reported since inception by eVestment Alliance as of 10/31/2025. The statistics do not reflect a representation of any one client's experience. Information shown is supplemental to GIPS Report, which are included at the end of this presentation on pages 4-5. A complete list and description of composites is available upon request. The calculation methodology for upside/downside market capture is available upon request. Returns for periods exceeding 12 months are annualized. Past performance is no guarantee of future results. Please see composite disclosures. The data is net of fees.

Market Review

Many equity and fixed income markets posted strong results in October. On the first of the month, the federal government of the United States shut down after Congress failed to pass appropriations legislation for the 2026 fiscal year. The shutdown has continued through the end of the month and is now the longest on record. As a result, many economic indicators were delayed during the month. It remains to be seen how the government shutdown and changes in trade policy will affect economic growth, inflation, and unemployment.

Near the end of the month, the FOMC reduced the Fed Funds Rate by another 25 basis points. With economic data delayed, there is uncertainty about the future path of the Fed Funds Rate. Overall, credit quality remains strong although there have been pockets of deterioration. Dolan McEniry will continue to monitor markets for any opportunities that may arise.

During the month, treasury rates decreased, as the 10-year U.S. Treasury yield decreased from 4.15% to 4.08%, the 5-year yield decreased from 3.74% to 3.69% and the 2-year yield decreased from 3.61% to 3.58%.

Per Bloomberg data, spreads of corporate investment grade bonds widened 5 basis points during the month to an average option adjusted spread ("OAS") of +79 basis points. The OAS of the Bloomberg Corporate High Yield Index widened 14 basis points to +281 basis points at month end.

Portfolio Commentary

During the month, the Dolan McEniry Credit Composite had a gross return of +0.33% and +0.30% net versus the benchmark which returned +0.40%. Sector attribution versus the benchmark is provided in the following table:

	Dolan McEniry Credit (Gross)	Dolan McEniry Credit (Net)	Bloomberg U.S. Intermediate Credit
Treasuries/ Government Related	+0.29%	+0.29%	+0.52%
Corporate Bonds IG	+0.23%	+0.23%	+0.38%
Corporate Bonds HY	+0.51%	+0.51%	+0.00%
Cash (including fees)	+0.22%	+0.19%	+0.00%
Total	+0.33%	+0.30%	+0.40%

On a relative basis, the Dolan McEniry Credit Composite underperformed the Bloomberg Intermediate Credit Index by 7 basis points during the month. The underperformance was driven by underperformance in the investment grade sector. During the month, yield curve positioning and duration had a minimal effect on performance versus the benchmark.

Outlook and Strategy

Dolan McEniry believes that client portfolios are positioned to provide reasonable absolute and relative returns going forward. Dolan McEniry's core competence is credit analysis, and we focus on a company's ability to generate generous amounts of free cash flow over time in relation to its indebtedness. Investment safety and risk mitigation are of primary importance as we continue to search for undervalued fixed income securities. As of October 31st, the Dolan McEniry Credit Composite had a +42 basis point yield premium and similar duration to the Bloomberg U.S. Intermediate Credit, which we believe will allow the portfolio to perform well versus the benchmark over time.

1. The 3-year ex-post standard deviation is not required to be presented for periods prior to 2011 or when 36 monthly composite returns are not available.
2. Returns are calculated and presented as net of maximum annual advisory fee, 2.50%, plus the maximum product manager fee, 0.40%.

Compliance Statement

Dolan McEniry Capital Management, LLC claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS standards. Dolan McEniry Capital Management, LLC has been independently verified for the periods September 30, 1997 through December 31, 2024. A firm that claims compliance with the GIPS standards must establish policies and procedures for complying with all the applicable requirements of the GIPS standards. Verification provides assurance on whether the firm's policies and procedures related to composite and pooled fund maintenance, as well as the calculation, presentation, and distribution of performance, have been designed in compliance with the GIPS standards and have been implemented on a firm-wide basis. The Dolan McEniry Credit Composite has had a performance examination for the periods December 31, 2008 through December 31, 2024. The verification and performance examination reports are available upon request.

Definition of the Firm

Dolan McEniry Capital Management, LLC is an independent investment management firm established in 1997 and is an SEC registered investment adviser. Registration of an adviser does not imply a certain level of skill or training. Dolan McEniry Capital Management, LLC manages fixed income accounts utilizing Dolan McEniry's specific strategies for institutional and individual clients.

Definition of the Composite

Dolan McEniry Credit is a fixed income investment product benchmarked against the Bloomberg U.S. Intermediate Credit Index. In this strategy, the firm utilizes U.S. corporate investment grade, U.S. corporate high yield and U.S. Treasury securities. Dolan McEniry Credit has averaged approximately 50% U.S. corporate investment grade bonds and 50% U.S. corporate high yield bonds. The Dolan McEniry Credit Composite was established and created on December 31, 2008.

Non-fee paying accounts represented less than 2% of the composite assets for all periods shown.

Benchmark

Bloomberg U.S. Intermediate Credit Index The Index is the intermediate component of the Bloomberg U.S. Credit Index. The Bloomberg U.S. Credit Index measures the investment grade, US dollar-denominated, fixed-rate, taxable, corporate and government –related bond markets. It is composed of the US Corporate Index and a non-corporate component that includes foreign agencies, sovereigns, supranationals, and local authorities.

Intra-month cash flows from interest and principal payments contribute to monthly Index returns but are not reinvested at a short-term reinvestment rate between rebalance dates. At each rebalancing, cash is effectively reinvested into the returns universe for the following month so that Index results over two or more months reflect monthly compounding. One cannot invest directly in an Index.

List of Composites

A complete listing and description of all composites, limited distribution pooled funds, and broad distribution pooled funds is available upon request.

Dispersion

The dispersion of annual returns is measured by the asset weighted standard deviation across gross portfolio returns represented within the composite for the full year.

Performance

Gross and net performance is net of all trading expenses. Composite Net Returns are presented net of actual investment management fees. Composite Net of Maximum Annual Advisory and Product Fee returns are calculated by subtracting 1/12th of 2.90% from the monthly gross return. 2.90% represents the maximum wrap fee that a sponsor may charge clients seeking investment management services in the designated strategy. Wrap fees may include, among others, custodial fees, portfolio management fees, administrative fees and transactional fees. The maximum product fee Dolan McEniry charges for management of a client portfolio is 40 basis points. The maximum wrap fee charged by a wrap platform is 250 basis points annually. All returns are based in U.S. dollars and computed using a time-weighted total return. Composite returns are asset weighted individual portfolios computed monthly. Returns for periods exceeding 12 months are annualized. The Dolan McEniry Credit Composite includes both price performance and coupon/dividend income as does the Bloomberg U.S. Intermediate Credit Index. Results reflect the reinvestment of dividends, interest and other earnings. The Dolan McEniry performance reflected above is not necessarily indicative of future results and, as a composite of different accounts, does not necessarily reflect the exact performance of any specific account. Policies for valuing investments, calculating performance, and preparing GIPS Reports are available upon request.

Fee Schedule

Dolan McEniry Capital Management, LLC's standard fee is 0.40% (40bps) of assets under management.
