OBJECTIVE

This strategy seeks to maximize risk adjusted returns through a diversified exposure to high-quality taxable municipal bonds. APA has over 30 years of experience managing taxable municipal bond portfolios and delivering the highest level of service to our clients. Generally, bonds considered for this strategy will have maturities between 1 to 20 years.

INVESTMENT PROCESS

- This strategy primarily invests in the highest-quality taxable municipal bonds
- We combine in-depth fundamental credit research with an investment process that emphasizes risk management
- Customize portfolios to meet your clients' specific objectives, income requirements, and risk tolerance
- Provide ongoing internal analysis of credit quality and underlying fundamentals

MARKET COMMENTARY FOR 3/31/24

The new year began with a clear disconnect between market sentiment about the timing of a potential commencement of Federal Reserve easing and the messaging and guidance from the Fed itself with Fed funds futures indicating an 80% chance of a 25bps rate cut in March. Conversely, Fed minutes released at the beginning of January signaled a March cut was unlikely, and growth and employment data showed no sign of the need to ease.

Mid-quarter data releases underscored the persistence of inflationary pressures and the resilience of the job market. Inflation readings surpassed expectations, with the core CPI registering a year-over-year increase. With inflation remaining above target and the job market seemingly on sound footing, the market expectation of when the Fed would begin easing finally began to get pushed further out.

By the time of the March FOMC meeting, Fed futures were pricing for 2-3 rate cuts for 2024, bringing market consensus in line with the view among Fed officials as revealed in their latest Summary of Economic Projections, the first time the two were aligned in many months. Treasury yields finished the month with relatively little change, while tax-exempts experienced relative underperformance amid a larger new issue calendar and seasonal pressures around tax time, where selling often occurs to meet tax liabilities. Over the month, municipal yields across various maturities saw upward movements and tax-exempt relative value ratios nudged higher, particularly on the short end, after sitting near historically tight levels. Municipal new issue supply totaled \$100.2 billion for the quarter, a 25% increase from Q1 last year. New money issuance totaled \$67.6 billion while refunding issuance came in at \$32.7 billion, a notable uptick from recent periods.

GIPS® is a registered trademark of CFA Institute. CFA Institute does not endorse or promote this organization, nor does it warrant the accuracy or quality of the content contained herein.

APA Taxable Municipal Composite

Past performance is not indicative of future results. This material is not financial advice or an offer to sell any product. The performance and portfolio characteristics shown relate to the APA Taxable Municipal Composite (the "Composite").

Composite Description: Asset Preservation Advisors ("APA") uses a fixed income strategy that purchases high quality taxable municipal bonds. The investment objective of the APA Taxable Municipal Composite is to maximize current income which is consistent with preservation of capital. Securities selected for these portfolios are typically investment grade issues with varying maturities.

Not every client's account will have these exact characteristics. The actual characteristics with respect to any particular client account will vary based on a number of factors including but not limited to: (i) the size of the account; (ii) investment restrictions applicable to the account, if any; and (iii) market predicaments at the time of investment. APA reserves the right to modify its current investment strategies and techniques based on changing market dynamics or client needs. The information provided in this report should not be considered a recommendation to purchase or sell any particular security. There is no assurance that any securities discussed herein will remain in an account's portfolio at the time you receive this report or that securities sold have not been repurchased. The securities discussed may not represent an account's entire portfolio, and in the aggregate may represent only a small percentage of an account's portfolio holdings. It should not be assumed that any of the security transactions, holdings or sectors discussed were or will prove to be profitable, or that the investment recommendations or decisions we make in the future will be profitable or will equal the investment performance of the securities discussed herein.

APA is an investment adviser registered with the U.S. Securities and Exchange Commission. Registration does not imply a certain level of skill or training. More information about the advisor including its investment strategies and objectives can be obtained by visiting www.assetpreservationadvisors.com. A list of composite descriptions is available upon request.

The investment objective of the APA Taxable Municipal Composite is total return through income. The Composite contains fully discretionary, fee paying accounts with a minimum asset level of \$1MM. For comparison purposes, the Composite is measured against the ICE BofA 1-10 Year AAA-AA US Corporate Index. The ICE BofA 1-10 Year AAA-AA US Corporate Index is a subset of ICE BofA US Corporate Index including all securities with a remaining term to final maturity less than 10 years and rated AAA through AA3, inclusive. The ICE BofA US Corporate Index tracks the performance of US dollar denominated investment grade corporate debt publicly issued in the US domestic market. Qualifying securities must have an investment grade rating (based on an average of Moody's, S&P and Fitch), at least 18 months to final maturity at the time of issuance, at least one-year remaining term to final maturity as of the rebalancing date, a fixed coupon schedule and a minimum amount outstanding of \$250 million. Original issue zero coupon bonds, 144a securities (with and without registration rights), and pay-in-kind securities (including toggle notes) are included in the index. Callable perpetual securities are included provided they are at least one year from the first call date. Fixed-to-floating rate securities are included provided they are callable within the fixed rate period and are at least one year from the last call prior to the date the bond transitions from a fixed to a floating rate security. Contingent capital securities ("cocos") are excluded, but capital securities where conversion can be mandated by a regulatory authority, but which have no specified trigger, are included. Other hybrid capital securities, such as those issues that potentially convert into preference shares, those with both cumulative and non-cumulative coupon deferral provisions, and those with alternative coupon satisfaction mechanisms, are also included in the index. Equity-linked securities, securities in legal default, hybrid securitized corporates, eurodollar bonds (USD securities not issued in the US domestic market), taxable and tax-exempt US municipal securities and \$1000 par preferred and DRD-eligible securities are excluded from the index. The volatility (standard deviation) of the Composite may be greater than that of the index. It is not possible to invest in the index. Leverage, derivatives or short positions are not used in this Composite. The annual composite dispersion is an equal-weighted standard deviation calculated for the accounts in the composite for the entire year. For this Composite, APA defines a significant cash flow as greater than or equal to 30% of an account's market value at the beginning of the measurement period. Accounts removed from the Composite due to significant cash flows will be excluded until the account meets the Composite's requirements. This significant cash flow policy has been applied for the entire history of the Composite. Effective May 2019 if 80% or more of the external cash flow's value is comprised of in-kind bonds that meet requirements of the strategy, that account is not removed from the Composite. The U.S. Dollar is used to express performance. The APA Taxable Municipal Composite was created December 31, 2009. The Composite's inception date is September 30, 2003.

Asset Preservation Advisors, LLC claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS standards. Asset Preservation Advisors, LLC has been independently verified for the periods January 1, 2004 through December 31, 2022. A copy of the verification report is available upon request. A firm that claims compliance with the GIPS standards must establish policies and procedures for complying with all the applicable requirements of the GIPS standards. Verification provides assurance on whether the firm's policies and procedures related to composite and pooled fund maintenance, as well as the calculation, presentation, and

distribution of performance, have been designed in compliance with the GIPS standards and have been implemented on a firm-wide basis. Verification does not provide assurance on the accuracy of any specific performance report.

The three-year annualized standard deviation measures the variability of the composite using gross returns, and the benchmark returns over the preceding 36-month period. The standard deviation is not presented for 2002 through 2010 because monthly composite and benchmark returns were not available and is not required for periods prior to 2011. Prior to January 2010 composite returns were calculated quarterly, therefore monthly returns for the 36-month period ended December 31, 2011 are not available and the standard deviation of the composite and benchmark are not presented.

Returns are presented gross and net of investment advisory fees and include the reinvestment of all income. Gross returns will be reduced by investment advisory fees and other expenses that may be incurred in the management of the account. For example, a 0.50% annual fee deducted quarterly (0.125%) from an account with a ten-year annualized growth rate of 5% will produce a net result of 4.4%. Actual performance results will vary from this example. Net returns were calculated using the highest management fee charged within the Composite through December 31, 2017. From January 2018 to present, APA uses actual fees to calculate net of fee performance. The Composite includes wrap/bundled fee accounts. In addition to brokerage commissions, this asset-based fee may include custodial, administrative and other expenses associated with the wrap sponsor's management of the accounts. APA does not receive any portion of the wrap fees paid by the client, except for management fees as stated in our contract with the corresponding wrap program sponsor. The Firm's policies for valuing portfolios, calculating performance, and preparing GIPS reports are available upon request.

The fee schedule for APA's investment advisory services for separately managed accounts in the APA Taxable Municipal Composite is 0.30% on net assets under management. Actual investment advisory fees incurred by clients may vary. As the Investment Adviser for the APA Taxable Municipal Bond Fund, L.P. (the "Taxable Fund"), which is included in the APA Taxable Municipal Composite, APA receives an asset management fee equal to annualized rate of 0.50% of net assets on the first \$10 million of the Taxable Fund net assets and 0.40% on amounts above \$10 million of the value of the Taxable Fund's net assets. The expense ratio, as reported in the Taxable Fund's Audited Financial Statements for its most recently ended December 31 fiscal year, is 0.92%. Fees paid by the Private Fund are described to Investors, in detail, in each Private Fund's private placement memorandum. Nothing herein should not be considered to be an offer of interest in any Private Fund. A complete description of APA's fee schedule can be found in Part 2 of its FORM-ADV which is available at www.assetpreservationadvisors.com or by calling (404) 261-1333. A list of pooled fund descriptions for limited distribution pooled funds is available upon request.

MARKET COMMENTARY FOR 3/31/24

The new year began with a clear disconnect between market sentiment about the timing of a potential commencement of Federal Reserve easing and the messaging and guidance from the Fed itself with Fed funds futures indicating an 80% chance of a 25bps rate cut in March. Conversely, Fed minutes released at the beginning of January signaled a March cut was unlikely, and growth and employment data showed no sign of the need to ease.

Mid-quarter data releases underscored the persistence of inflationary pressures and the resilience of the job market. Inflation readings surpassed expectations, with the core CPI registering a year-over-year increase. With inflation remaining above target and the job market seemingly on sound footing, the market expectation of when the Fed would begin easing finally began to get pushed further out.

By the time of the March FOMC meeting, Fed futures were pricing for 2-3 rate cuts for 2024, bringing market consensus in line with the view among Fed officials as revealed in their latest Summary of Economic Projections, the first time the two were aligned in many months. Treasury yields finished the month with relatively little change, while tax-exempts experienced relative underperformance amid a larger new issue calendar and seasonal pressures around tax time, where selling often occurs to meet tax liabilities. Over the month, municipal yields across various maturities saw upward movements and tax-exempt relative value ratios nudged higher, particularly on the short end, after sitting near historically tight levels. Municipal new issue supply totaled \$100.2 billion for the quarter, a 25% increase from Q1 last year. New money issuance totaled \$67.6 billion while refunding issuance came in at \$32.7 billion, a notable uptick from recent periods.

APA Taxable Municipal Composite

Past performance is not indicative of future results. This material is not financial advice or an offer to sell any product. The performance and portfolio characteristics shown relate to the APA Taxable Municipal Composite (the "Composite").

Composite Description: Asset Preservation Advisors ("APA") uses a fixed income strategy that purchases high quality taxable municipal bonds. The investment objective of the APA Taxable Municipal Composite is to maximize current income which is consistent with preservation of capital. Securities selected for these portfolios are typically investment grade issues with varying maturities.

Not every client's account will have these exact characteristics. The actual characteristics with respect to any particular client account will vary based on a number of factors including but not limited to: (i) the size of the account; (ii) investment restrictions applicable to the account, if any; and (iii) market predicaments at the time of investment. APA reserves the right to modify its current investment strategies and techniques based on changing market dynamics or client needs. The information provided in this report should not be considered a recommendation to purchase or sell any particular security. There is no assurance that any securities discussed herein will remain in an account's portfolio at the time you receive this report or that securities sold have not been repurchased. The securities discussed may not represent an account's entire portfolio, and in the aggregate may represent only a small percentage of an account's portfolio holdings. It should not be assumed that any of the security transactions, holdings or sectors discussed were or will prove to be profitable, or that the investment recommendations or decisions we make in the future will be profitable or will equal the investment performance of the securities discussed herein.

APA is an investment adviser registered with the U.S. Securities and Exchange Commission. Registration does not imply a certain level of skill or training. More information about the advisor including its investment strategies and objectives can be obtained by visiting www.assetpreservationadvisors.com. A list of composite descriptions is available upon request.

The investment objective of the APA Taxable Municipal Composite is total return through income. The Composite contains fully discretionary, fee paying accounts with a minimum asset level of \$1MM. For comparison purposes, the Composite is measured against the ICE BofA 1-10 Year AAA-AA US Corporate Index. The ICE BofA 1-10 Year AAA-AA US Corporate Index is a subset of ICE BofA US Corporate Index including all securities with a remaining term to final maturity less than 10 years and rated AAA through AA3, inclusive. The ICE BofA US Corporate Index tracks the performance of US dollar denominated investment grade corporate debt publicly issued in the US domestic market. Qualifying securities must have an investment grade rating (based on an average of Moody's, S&P and Fitch), at least 18 months to final maturity at the time of issuance, at least one-year remaining term to final maturity as of the rebalancing date, a fixed coupon schedule and a minimum amount outstanding of \$250 million. Original issue zero coupon bonds, 144a securities (with and without registration rights), and pay-in-kind securities (including toggle notes) are included in the index. Callable perpetual securities are included provided they are at least one year from the first call date. Fixed-to-floating rate securities are included provided they are callable within the fixed rate period and are at least one year from the last call prior to the date the bond transitions from a fixed to a floating rate security. Contingent capital securities ("cocos") are excluded, but capital securities where conversion can be mandated by a regulatory authority, but which have no specified trigger, are included. Other hybrid capital securities, such as those issues that potentially convert into preference shares, those with both cumulative and non-cumulative coupon deferral provisions, and those with alternative coupon satisfaction mechanisms, are also included in the index. Equity-linked securities, securities in legal default, hybrid securitized corporates, eurodollar bonds (USD securities not issued in the US domestic market), taxable and tax-exempt US municipal securities and \$1000 par preferred and DRD-eligible securities are excluded from the index. The volatility (standard deviation) of the Composite may be greater than that of the index. It is not possible to invest in the index. Leverage, derivatives or short positions are not used in this Composite. The annual composite dispersion is an equal-weighted standard deviation calculated for the accounts in the composite for the entire year. For this Composite, APA defines a significant cash flow as greater than or equal to 30% of an account's market value at the beginning of the measurement period. Accounts removed from the Composite due to significant cash flows will be excluded until the account meets the Composite's requirements. This significant cash flow policy has been applied for the entire history of the Composite. Effective May 2019 if 80% or more of the external cash flow's value is comprised of in-kind bonds that meet requirements of the strategy, that account is not removed from the Composite. The U.S. Dollar is used to express performance. The APA Taxable Municipal Composite was created December 31, 2009. The Composite's inception date is September 30, 2003.

Asset Preservation Advisors, LLC claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS standards. Asset Preservation Advisors, LLC has been independently verified for the periods January 1, 2004 through December 31, 2022. A copy of the verification report is available upon request. A firm that claims compliance with the GIPS standards must establish policies and procedures for complying with all the applicable requirements of the GIPS standards. Verification provides assurance on whether the firm's policies and procedures related to composite and pooled fund maintenance, as well as the calculation, presentation, and

distribution of performance, have been designed in compliance with the GIPS standards and have been implemented on a firm-wide basis. Verification does not provide assurance on the accuracy of any specific performance report.

The three-year annualized standard deviation measures the variability of the composite using gross returns, and the benchmark returns over the preceding 36-month period. The standard deviation is not presented for 2002 through 2010 because monthly composite and benchmark returns were not available and is not required for periods prior to 2011. Prior to January 2010 composite returns were calculated quarterly, therefore monthly returns for the 36-month period ended December 31, 2011 are not available and the standard deviation of the composite and benchmark are not presented.

Returns are presented gross and net of investment advisory fees and include the reinvestment of all income. Gross returns will be reduced by investment advisory fees and other expenses that may be incurred in the management of the account. For example, a 0.50% annual fee deducted quarterly (0.125%) from an account with a ten-year annualized growth rate of 5% will produce a net result of 4.4%. Actual performance results will vary from this example. Net returns were calculated using the highest management fee charged within the Composite through December 31, 2017. From January 2018 to present, APA uses actual fees to calculate net of fee performance. The Composite includes wrap/bundled fee accounts. In addition to brokerage commissions, this asset-based fee may include custodial, administrative and other expenses associated with the wrap sponsor's management of the accounts. APA does not receive any portion of the wrap fees paid by the client, except for management fees as stated in our contract with the corresponding wrap program sponsor. The Firm's policies for valuing portfolios, calculating performance, and preparing GIPS reports are available upon request.

The fee schedule for APA's investment advisory services for separately managed accounts in the APA Taxable Municipal Composite is 0.30% on net assets under management. Actual investment advisory fees incurred by clients may vary. As the Investment Adviser for the APA Taxable Municipal Bond Fund, L.P. (the "Taxable Fund"), which is included in the APA Taxable Municipal Composite, APA receives an asset management fee equal to annualized rate of 0.50% of net assets on the first \$10 million of the Taxable Fund net assets and 0.40% on amounts above \$10 million of the value of the Taxable Fund's net assets. The expense ratio, as reported in the Taxable Fund's Audited Financial Statements for its most recently ended December 31 fiscal year, is 0.92%. Fees paid by the Private Fund are described to Investors, in detail, in each Private Fund's private placement memorandum. Nothing herein should not be considered to be an offer of interests in any Private Fund. A complete description of APA's fee schedule can be found in Part 2 of its FORM-ADV which is available at www.assetpreservationadvisors.com or by calling (404) 261-1333. A list of pooled fund descriptions for limited distribution pooled funds is available upon request.
