A complete list of portfolio holdings and specific securities transactions for the preceding 12 months is available upon request.

Benchmark Returns:

The benchmark returns for each strategy show the performance of a benchmark comprised of broad market indices selected by iMGP as representative of various asset classes, weighted in a manner that corresponds to the long-term strategic allocation among asset classes that iMGP has targeted for that strategy. A strategy's benchmark performance is intended to represent the historical returns of that strategy's target allocation among asset classes. A strategy's benchmark is not directly comparable to its model portfolio, however. As noted above, iMGP is not required to allocate a model portfolio among asset classes in accordance with the target allocation for a strategy and makes tactical departures from the target allocations in its discretion. In addition, the model portfolios contain actively managed mutual funds and ETFs, while the benchmarks only attempt to track the general equity and fixed income markets. The securities held by the funds in the model portfolios may differ significantly from the securities included in the benchmark's indices, and the volatility of the funds may differ significantly from that of the indices.

The benchmark returns reflect the reinvestment of dividends and other earnings of securities in the indices. However, they do not reflect the deduction of transaction costs or sponsor fees, all of which reduce the returns of the model portfolios. Further information about the composition of the benchmarks is shown below.

Benchmark Descriptions:

Defensive Balanced—consists of an 80% weighting to the Vanguard Total Bond ETF, 10% weighting in the iShares Core S&P 500 ETF, 2% weighting in the Vanguard Russell 2000 ETF, 4% weighting in the Vanguard FTSE Developed Markets ETF, and a 4% weighting in the Vanguard FTSE Emerging Markets ETF.¹

iM Global Partner Fund Management, LLC ("iMGPFM") has entered into contractual arrangements with certain sponsors of the AdvisorIntelligence website that permit the sponsors to post information on the AdvisorIntelligence website, including information regarding the investment funds that the sponsors manage ("Participating Sponsor Funds" and together with the iMGP Funds, the "Affiliated/Sponsored Funds"). The content available on AdvisorIntelligence includes, among other things, recommendations to invest in Affiliated/Sponsored Funds. These arrangements create a material conflict of interest because iMGPFM has an incentive to recommend the Affiliated/Sponsored Funds on AdvisorIntelligence because iMGPFM's recommendations will likely result in additional investments in the Affiliated/Sponsored Funds, and indirectly, additional management fees, sponsorship fees and other benefits to iMGPFM or its affiliates. iMGPFM will not offset subscription fees by the amount of management fees or sponsorship fees collected from the Affiliated/Sponsored Funds or their affiliates, provided however that iMGPFM offers discounted subscription fees to subscribers that also invest in the iMGP Funds. To the extent the subscription fee is not waived, iMGPFM seeks to manage this conflict of interest by conducting investment due diligence and analysis on the funds that it recommends including the Affiliated/Sponsored Funds and by seeking to include, from time to time, multiple third-party fund recommendations for each asset class which may include but are not limited to the Affiliated/Sponsored Funds. It is iMGPFM's policy not to take into account any funds' arrangements with iMGPFM in deciding which funds to research or recommend.
